

# Toyo-Vetiver Grass System

Bio-Engineering Solution to Erosion Control

## APPLICATIONS

- 1 Steep slope stabilization
- 2 Riverbank stabilization
- 3 Engineering structural protection
- 4 Landscape improvement on landfill
- 5 Rehabilitation on mining site
- 6 Prevent flooding along riverbank
- 7 Waste water purification
- 8 Landscape improvement on shotcrete slop

## ADVANTAGES

1. Natural and environmental friendly
2. Cost effective
3. Easy and fast installation
4. Can be applied on steep slopes
5. Low maintenance
6. High vegetation coverage
7. Seasonal greening
8. Not invasive
