

Cocopeat Soil Conditioner

Hydroponic Growing Medium

Coconut Husks

Cocopeat is a natural and renewable resource produced from coconut husks. It is completely homogeneous material composed of millions of capillary micro-sponges, which helps to absorb and holds water in soil. It improves the structure of the soil facilitating good air movement and drainage, enabling roots to breathe. The high organic content also encourages the activity of beneficial soil dwelling organisms, making your soil a healthy place for your plants to grow.

TOYO'S COCOPEAT EXPAND PROCESS

1. Raw cocopeat in block

2. Expanding cocopeat at Toyo nursery

3. Mixed with soil

4. Improve the planting media for plants to grow
