Waste-Cover

Make The Landfill More Efficient

Waste-Cover is an alternate daily landfill cover manufactured from recycled paper and wood, polymers, enzyme complex, and other proprietary ingredients. All ingredients are non-toxic and biodegradable. Waste-Cover helps breakdown the garbage faster and helps alleviate odors.

Why Waste -Cover

By year 2015, landfills in Hong Kong will be full. The life of any landfill depends on the remaining permitted available airspace. Each cubic yard of dirt that is used for daily cover results in a permanent loss of landfill space. Use of Waste-Cover helps to save up to 35% of space and add life of landfill.

Advantages of Waste-Cover

- Conserve landfill space
- Non-toxic and biodegradable
- Non-flammable
- Only 1/2 Inch Thick
- Control Blowing Litter
- Reduce Noxious Odor
- Minimize Disease Vector
- Repel Vermin
- Aesthetically Acceptable

TOYO GREENLAND CO., LTD.

Use of Waste-Cover

Spray Waste-Cover through Toyo hydraulic mulching machines as slurry quickly sets up to create a complete cover. Operations do not need to track through working face. Dark Green or gentle blue color makes it easy to see and aesthetically pleasing.

Product Information

Methods of Application	Truck mounted or trailer mounted hydro-seeding equipment with spray tower and nozzle
Removal of Waste Cover	No need to remove the cover
Application in Different Climates	- Can apply in light rain. Once cured, can withstand moderate to heavy rainfall - Can generally apply in winds up to 45 mph - Can apply in freezing temperatures or snow - No constraints to hot weather
Disease Vector Control	- Discourages insects and birds from landing - Discourages rodents from digging
Fire Control	Barrier to air/ gas movement
Odor and Air Emission Control	Controlled by uniform coverage of sufficient thickness of Waste-Cover
Environmental Control	- Dust control - Blowing litter control - Water infiltration control
Life Expectancy	Some last up to 14 days
